Reasons for allowance

1. This communication is in response to applicant's 11/25/2005 amendment in the application of Gawargy et al. for a "Session initiation protocol based advanced intelligent network/intelligent network messaging" filed 11/30/2000. This application is a Request for Continued Examination (RCE) under C.F.R. 1.114 filed on November 25, 2005. The proposed amendment has been entered and made of record. Claims 1, 25 have been amended, and claims 5 and 29 has been canceled per applicant's request. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.

2. Claims 1-4, 6-28, 30-52, 54-71 are allowable as evident by applicant's amendment (Claims are renumbered as 1-68 respectively).

3. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a no obvious improvement over the prior art of record. The improvement comprises wherein the node comprises either one of a media gateway controller adapted to enable telephony signal traffic through the broadband packet network, and an application server adapted to invoke IN/AIN functionality using TCAP functional content; a CCS network element adapted to send and receive PDU's of the broadband packet network; and a network element of the broadband packet network; means for formulating a transaction message and means for inserting the formulated transaction message into a payload portion of the PDU, as recited in the claims. The prior art of record also fails to disclose or suggest wherein

the means for mapping comprises means for mapping a TCAP/INAP message type onto a respective message type of the PDU, mapping a transaction message parameter onto a respective PDU message parameter; and wherein the encoded message payload is mapped into a payload portion of a MIME part of the PDU, as specifically recited in the claims. The instant invention, in combination with the other claimed features, improves upon the Prior Art by providing a method and system for enabling IN/AIN functionality for telephone services deployed in a broadband packet network.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
